

LONTON & GRAY SAILMAKERS

SQUIB

For the 2010 season Lonton and Gray have teamed up with Peter and David White and all of our Squib sails will be sold now through White Marine Services.

There will be no changes to the mainsail and spinnaker designs for the foreseeable future. However there are slight changes to the jib for 2010. The new jib will have a finer entry off the luff above the lower hank i.e. the top 2/3rds of the luff length. This change will make the entry consistent from top to bottom and will make it much easier to point high in moderate and light conditions and the boat much easier to control in strong winds. There will also be slight increases in the draft at the foot and this will improve the power generated low down.

For information on barber hauler settings, halyard and cunningham tension, jib sheet tensions and other tuning advice to make the best use of these fast sails, please contact David or Peter at White Marine Services.

2009 Results

8th Overall- National Championships
2nd Overall- Inland Championships
5th Overall- East Coast Championships
4th Overall- Squib Gold Cup

2008 Results

Winner- 40th Anniversary Regatta

LONTON & GRAY SAILMAKERS

SQUIB

Spinnakers £383 EX VAT

Vertical- This spinnaker is what's become the 'standard' Squib spinnaker. It has 7 vertical panels and has proved to be very effective on championship triangle courses.

Horizontal- This spinnaker has 8 horizontal panels and has proved to be very effective on windward/leeward course configurations.

Both sails are made from silicone coated cloth to allow the sail to be easily pulled around the forestay and under boom during dropping.

Supplied with sail numbers and sailbag.

Sails can be officially measured and signed for £11 EX VAT per sail

Headsails £375 EX VAT

LGSQJ4- In conjunction with White Marine Services we have designed a new headsail for the 2010 season. This sail has a finer entry of the luff above the lower hank. This makes the entry consistent from top to bottom and makes pointing much better in lighter conditions and a more controllable sail in heavier winds. The draft in the foot has also been slightly increased which improves the power generated lower down.

Sails are made to a cross cut design using Contender Squib sailcloth- 5.52oz Polypreg.

Supplied with window, telltales and sail bag. Hanks are fitted as standard.

Sails can be officially measured and signed for £11 EX VAT per sail

Mainsails £597 EX VAT

LGSQM3- This has become the standard Squib sail and has been designed to tailor in neatly with the new J4 jib. It is suitable for all crew weights and wind conditions. It is ideal for use in rough water conditions as the design means there is plenty of power to go through the chop.

Sails are made to a cross cut design using Contender Squib sailcloth- 5.52oz Polypreg.

Supplied with window, cunningham, sail numbers, battens, telltales and boom length sailbag.

Sails can be officially measured and signed for £11 EX VAT per sail
